ABSTRACTED-PUB-NO: NL 1011049C

BASIC-ABSTRACT:

NOVELTY - The device has two pivotal arms (2) shaped like calipers. The arms pivot at the ends of a cross bar (3). A tape (7) runs between the ends (8) of the arms and a spring loaded central measuring assembly (10). The handles (5) are used to open out the arms, which are put over the pig's back and closed under the pig's belly. The tape (7) is then in contact with the pig's body and the girth can be read off on a linear scale (13).

USE - Estimating weight of a pig by measuring girth.

ADVANTAGE - Accurate and rapid measurement.

DESCRIPTION OF DRAWING(S) - The drawing shows a side view of the device.
